

# Hello Boys!

PRIZE

WINNERS

**ERECTOR**

# ALL YOU BOYS HAVE HELPED ME

## So I Have Built Up A Big Business

I believe I number among my friends a million boys. I am proud of their acquaintance. Stacks of boys' letters come to me every day from all parts of the world.

I am hustling—thinking—planning every minute to give boys and girls more fun—more good things to play with.

I know what they like; that's why I made Erector.

### YOU KNOW WHAT ERECTOR IS—

It's the world-famous building toy with which you can build big things of steel like sky-scrappers, battleships, derricks, elevators, bridges, aeroplanes, siege guns, etc., and 500 other models shown in our manuals of instruction. Scores of these models are operated by our electric motors described on the next page.

### BE SURE THAT YOU GET ERECTOR

Go to your toy dealer and see it there—or write for our 24-page booklet printed in bright colors. Remember that Erector is the

ONLY CONSTRUCTION TOY  
WITH GIRDERS  
LIKE STRUCTURAL STEEL

**"M" Sets—With Motors.**—If you desire a motor with a No. 1, No. 2 or No. 3 sets you ask your dealer for a No. 1M, No. 2M or 3M set. As you will notice on page 5 in the price list, the "M" sets cost 75 cents more than the regular sets. This means that you can have a No. 1 set with a motor at \$1.75; a No. 2 set with a motor at \$2.75 or a No. 3 set with a motor at \$3.75. But you must buy a motor at the same time that you purchase the set—otherwise the motor is \$1—that is when sold alone.

### SEPARATE MOTORS

We have separate motors in boxes at 50c., \$1, \$1.50 and \$5.00.

- No. P52 runs light models  
—good for little toys. . . . \$0.50
- No. P53 is strong and ready  
for hard work. . . . . 1.00
- No. P54 reverses. Has switch  
in base. . . . . 1.50
- No. P56 operates on any  
house current—110 volts. It  
saves buying batteries. . . . 5.00

Send for our special electric motor folder describing these motors in detail.

**Big Prize Contest No. 3**

# THE 1915 PRIZE-WINNING MODELS

THE MYSTO MANUFACTURING CO., New Haven, Conn.

# ERECTOR ELECTRIC MOTORS

CAN NOW BE BOUGHT WITH

## ALL ERECTOR OUTFITS

### MORE FUN

### THAN EVER

Which Set of Erector would you like to have? If a No. 4, 5, 6, 7 or 8 you will find a motor packed right in the box. But if it is a No. 1, 2 or 3 the motor comes separately and can be bought for only \$1. Now, read every word we have to say about Erector Motors. Here's the full information about them and their prices.

### The Motor "With a Punch"

Our 1914 motor was a wonder. This is the truth. It was a better motor for \$1 than many of the \$2.50, \$3.00 and \$4.00 motors offered by toy dealers. But our new motor out-ranks everything.

As sold in Erector sets it has four terminals. Two of these terminals are connected with a wire, and by pulling out this wire and buying our reversing base, you can make your motor over into a reversing motor. This motor operates instantly at a touch of the switch; works quick, reverses models, and takes current evenly.

### Reversing Switch Base

For 50 cents extra you can purchase our reversing switch base, and operate your Erector motor in either direction. You can mount the motor on the base or you can separate the base from 10 to 1000 feet and operate your motor backwards and forward. This is a scheme which has never been worked before in toys, and gives you boys a chance to do all kinds of new stunts. Be sure to purchase a switch base from your dealer. Of course if you purchase a No. 6, No. 7 or No. 8 Erector, you will find a reversing switch base packed with it.

Now boys, I have dug deep into my pockets to buy you a big list of prizes to reward you for building for me the biggest and most original models. I will divide on April 1st, 1916, \$3,000 between 307 boys. Among the prizes are the following:

- Trumbull Automobile, worth.....\$395.00
- Two Motorecycles.....\$125.00 each
- Bicycles, Canoe, Camp Outfits, Skates, Air Rifles, Erector Sets, Magic Trick Sets, etc., etc.

## PART 3 OF MANUAL

We now build over 500 models with the Erector Sets. The new prize models and others will be published in part 3 of our Manual of Instruction. Along with each model—especially the Prize Winners—will be placed the picture of the boy who won the prize. You will certainly want this Part 3, as it will give you hundreds of new ideas. Be sure to send 15 cents and Part 3 will be sent postage free.

# ERECTOR "TIPS"

## MY BOYS' MAGAZINE

**6c.** FOR POSTAGE. If you do not read "Tips" you are missing a bunch of fun. It is a mighty lively paper. It is devoted to the very things that you boys are interested in—gives pictures of boys who win prizes in our Contest, shows new models, has a continued story about boys at boarding school, college, etc. Send us 6 cents and the names of ten boys written in their own handwriting, and we will send you a subscription free for six months.

Send in your subscription to-day.

Write me personally, as I always enjoy hearing from my boy friends.

7 (Wood Box)	†1291	*278	15.00	18.75
8 (Wood Box)	†1850	*304	25.00	31.25

†Has Motor.

‡Has Reversing Motor.

\*200 other models—all new—made from all sets, in Part 3 of Manual. Buy it—15c.

## Accessory Outfits

**Motor in 3A.**—If you get Nos. 1, 2 and 3 regular sets—remember that the 3A contains a motor which will build your No. 3 into a No. 4. Always look forward to getting the 3A set and higher ones, because they will assist you in building big models which you can enter in our big Prize Contest now going on. There is a big bunch of fun running your models with this motor with a punch. Do not turn wheels by hand or with a crank when an electric motor will do it.

	U.S.A. Prices	Canadian Prices
No. 1A makes No. 1 into No. 2	\$ 1.00	\$ 1.25
No. 2A makes No. 2 into No. 3	1.00	1.25
No. 3A makes No. 3 into No. 4 (Motor)	2.00	2.50
No. 4A makes No. 4 into No. 5	2.50	3.25
No. 5A makes No. 5 into No. 6 (Reverse Switch)	2.50	3.25
No. 6A makes No. 6 into No. 7	5.00	6.25
No. 7A makes No. 7 into No. 8	10.00	12.50
