Dear Friend:-

I surely appreciate your inquiry and enclose my booklet.

MORE PARTS--MORE MODELS.--Just see how many models you can make with the Mysto Erector in comparison with other model builders.

25.00 "	1850	304	

You get a big lot of parts for your money. That means more fun. Remember the Mysto Erector is the only building toy that resembles structural steel; that builds a square steel girder; that builds bigger models, better models, more realistic. It builds with less screws, much easier and quicker than any other such toy.

MOTOR.- The Erector is the only toy that has a set-up-motor--ready to run. This motor is extra strong and can be attached to a transformer or to batteries. See booklet for description.

FREE INSTRUCTION BOOK.- With each outfit I give you a Manual full of drawings of models which explain all details. This Manual of Instructions is the biggest of all, and shows how to build 300 models.

WE HAVE A DEALER IN YOUR LOCALITY.- Take this booklet to your toy dealer mentioned on the enclosed yellow slip. You will find him mentioned there. If he hasn't the set you desire, he will order it from us.

BOYS' PAPER "ERECTOR TIPS."-Every owner of an Erector outfit is entitled to a subscription to our boys paper entitled "Erector Tips" by sending us six cents in stamps for mailing.

Yours for a good time,
THE MYSTO MFG. CO.
